Gladhand Couplings

Die cast aluminum body. Available in blue service, red emergency, or silver universal. Gladhand couplings are sold individually, not in pairs.

Item #	Description	Price
3079850	Service Gladhand (blue)	\$11.09
3079851	Emergency Gladhand (red)	\$11.09
3076150	Universal Gladhand (fits either)	\$11.09

Air Brake Fittings (Nylon Tubing)

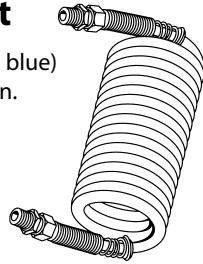

Use with NT100 Nylon Air Brake Tubing. Meets all applicable SAE and DOT specifications.

Air Brake Coiled Hose Kit

Hose kit includes two hoses (1 red and 1 blue) pre-assembled for immediate installation.

Maximum working pressure: 150 psi
Temperature range: -40° to 200° F

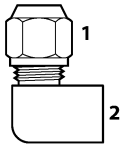

Conforms to DOT FMVSS 571.106, SAE J844 Type B, and SAE J1131.

Item #	Hose Length	Pigtail	Price
3W1206	12 feet	6 inches	\$58.41
3W1212	12 feet	12 inches	\$67.93
3W1512	15 feet	12 inches	\$76.32

Coiled Air Hose Assemblies

Hose Assemblies

Recommended for use with pneumatic tools. Lightweight, self-retracting hose coil eliminates the need for reels and other expensive take-up devices. Available in yellow only.

- 200 psi max. working pressure at 78° F
- 800 psi minimum burst
- NPTF male pipe fittings (one end swivels)

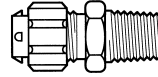

Caution: Do not use in applications where temperature exceeds 200° F. Higher temperatures could result in hose rupture.

Recommended for general purpose air, water and other low pressure applications. Nylon fittings should not be used with acid-based fertilizers, bromine, chlorine, flourine, hydrochloric acid, iodine, nitric acid, phosphoric acid, sulfuric acid, or xylene. Made with material approved by the FDA. Nylon fittings should not be used with compressed gas.

Fasten all hose barbs securely with hose clamps or ferrules (page 30).

Garden Hose Fittings

Garden Hose Fittings feature brass construction and 3/4-11.5 NH thread.

Ferrule Vises

Our ferrule vise crimping tools are ideal for light duty repetitive hose crimping. With a wide variety of available dies (sold separately) in either ribbed or straight configuration, these crimpers will consistently produce good looking accurate crimps time after time. Positive over-center action assures a consistent and repeatable crimp diameter with no need for adjustment.

The rugged cast iron frame and base is designed to provide years of dependable service and both the 670T and the 660T models have mounting holes which permit them to be securely mounted to a workbench.

- 660T Manually-Operated Ferrule Vise \$725.00**
- 670T Air-Operated Ferrule Vise \$1995.00**
Requires 80 psi compressed air (not included).
- Dies All Sizes (see pages 40-41) \$132.00**
each

670T Air-Operated Ferrule Vise

660T Manually-Operated Ferrule Vise

Brass Ferrule Crimper

The 855 Brass Ferrule Crimper provides "big tool" crimping advantages at a fraction of the cost. Rugged, portable and easy to use. Available in two models, each with five dies. Additional dies are available to increase the range of your crimper. *Use with brass ferrules only.*

- 855 Brass Ferrule Crimper (.49" to .71") \$160.00**
Includes 856-1, 856-2, 856-3, 856-4 and 856-5 dies
- 855A Brass Ferrule Crimper (.45" to .67") \$160.00**
Includes 856-1, 856-2, 856-3, 856-4 and 856-7 dies

CAUTION: the hose assembly tools on this page are not intended for use with high pressure hose assemblies. Please see our hydraulic hose crimpers beginning on page 60.

Brass Ball Valves

Full-Port Forged Brass Ball Valves

With forged brass bodies for strength, and solid chrome-plated balls, these valves are suitable for a wide range of liquids and gases. Full-size ports minimize pressure drop and allow full flow in both directions.

- 600 psi WOG (non shock) and 150 WSP saturated steam
- Virgin PTFE stem packing seal, thrust washer and seats.
- Yellow vinyl insulator on heavy-duty plated steel handle.
- Fast one-quarter turn open or close operation.
- Low operating torque.
- Adjustable stem packing gland.
- Bottom-entry, blow-out proof stem.
- Temperature range: -20° F to 248° F

Chrome Plated Mini Brass Ball Valves

Maximum working pressure: 235 psi
(will handle 300 psi @ 75° F)

- Solid chrome plated brass ball
- Longer body style for longer, deeper thread connections
- One piece drawn sand blasted chrome plated body
- Each valve is seal tested for maximum safety
- Double seal system allows valve to operate in both directions
- Blowout-proof brass stem
- Temperature range: 32° F to 176° F

Male NPTF x Female NPTF

Item #	NPTF	Price
46-9001	1/8"	\$9.75
46-9031	1/4"	\$9.75
46-9041	3/8"	\$9.75
46-9051	1/2"	\$10.15

Female NPTF

Item #	NPTF	Price
46-9201	1/8"	\$9.10

46-9231	3/8"	\$9.10
46-9241	1/2"	\$10.29

Drain Cocks & Needle Valves

for instrumentation, hydraulic and pneumatic systems.

Use with copper, steel, aluminum, plastic tubing or hose where applicable.

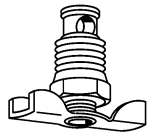

Conformance: Designed for automotive or industrial use. Not intended for natural gas, LPG, nuclear or aircraft applications, except as noted.

Material: Brass bodies with steel handles, except where noted.

Maximum Pressure: 150 psi

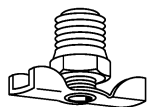

Temperature: -65° to 250° F (refer to tubing temp. range)

Drain External Seat

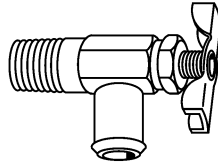

Item#	Pipe	Lng.	Price

K1134-16	1"	1.41"	300	180	300'	\$1.84	\$1.94

* Available in full reel or 100 ft. lengths only.

Please specify color when ordering:

Red (K1134) available in all sizes

Blue (K1136), sizes -04, -06, -08, -12 and -16 only

Gray (K1138), sizes -04, -06, -08, -12 and -16 only

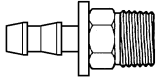

Yellow (K1131), sizes -04, -06, -08, -12 and -16 only

Low Pressure Hose & Tubing

Construction: black, oil resistant Nitrile (BTR) tube with braided fiber reinforcement. Oil and abrasion resistant, black Neoprene (CR) cover.

Temperature Range: -40°F to +212°F
Water not to exceed 150°F
Air not to exceed 160°F

Push-Lock Hose Barbs, page 22

3384 | Push-Lock Hose

Recommended for gasoline, fuel and lubricating oils, air and water. No clamps or ferrules needed when used with Push-Lock hose barbs.

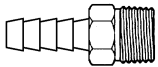

Item #	Inside Diameter	Outside Diameter	Maximum Operating (PSI)	Minimum Burst (PSI)	Minimum Bend Radius	Length on Reel	Reel Price (per foot)	Cut Price (per foot)
3384-04	1/4"	0.50"	250	1,000	3"	250'	\$1.20	\$1.25

3384-12	3/4"	1.03"	250	1,000	7"	250'	\$3.14	\$3.30

Push-Lock Hose is also available in Blue (3385), Gray (3386), Red (3387), and Yellow (3389). Please specify color when ordering.

Construction: clear PVC tubing with high tensile polyester yarn reinforcement.

Temperature Range: 14°F to 149°F

Brass Hose Barbs, page 25
Clamps and Ferrules, page 27

IBR | Clear Braided PVC Tubing

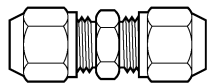

Recommended for various machine tools and transportation of chemicals.

Item #	Inside Diameter	Outside Diameter	Maximum Operating (PSI)	Coil Length	Coil Price	Cost (Per Foot)
IBR0446	1/4"	0.50"	142 psi	300'	\$129.00	\$0.43
IBR0609	3/8"	0.63"	114 psi	300'	\$168.00	\$0.56
IBR0812	1/2"	0.75"	100 psi	300'	\$210.00	\$0.70
IBR1218	3/4"	1.06"	71 psi	300'	\$408.00	\$1.36
IBR1621	1"	1.31"	71 psi	200'	\$350.00	\$1.75

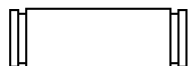

IBR tubing is sold in coil lengths only.

Construction: nylon tubing with braided fiber reinforcement.

Air Brake Fittings, page 11

Push-In Air Brake Fittings, page 13

NT100 | Nylon Air Brake Tubing

Meets all requirements for SAE J844 Type A & B and DOT FMVSS 571.106

Recommended for air brake systems except where temperatures exceed 200°F or where battery acid can drip on tubing. Sizes 3/8" and larger include braided polyamide fiber reinforcement. *Minimum purchase: 100 feet.*

Item #	Outside Diameter	Wall Thickness	Maximum Working Pressure ¹	Minimum Burst Pressure ¹	Minimum Bend Radius	Price (per foot)
NT100-02BK ²	1/8"	.023"	150 psi	1,000 psi	3/8"	\$0.19
NT100-04BK	1/4"	.040"	150 psi	1,200 psi	1"	\$0.50

NT100-06BK	3/8"	.062"	150 psi	1,400 psi	1 1/2"	\$1.03
NT100-08BK	1/2"	.062"	150 psi	950 psi	2"	\$1.46
NT100-10BK	5/8"	.092"	150 psi	900 psi	2 1/2"	\$2.51
NT100-12BK	3/4"	.092"	150 psi	800 psi	3"	\$3.20

1/8" and 5/16" sizes available in black only. Other sizes available in Black (BK), Blue (BU), Red (RD), Green (GN), Gray (GY), Orange (OR), Yellow (YW) and White (WH).

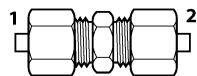

¹ Max. working and min. burst pressures measured at 75°F

² Insert not required. Does not meet DOT standards.

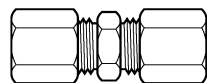

Temperature Range: -40°F to +200°F

Construction: soft, pliable, clear plasticized PVC resin tubing.

Poly-Tube Fittings, page 10

Compression Fittings, page 7

PT200 | Polyvinyl Chloride Tubing

Recommended for low pressure laboratory, industrial, agricultural or domestic applications. Soft, pliable, plasticized PVC resin available in clear (NA) only. *Minimum purchase: 100 feet.*

Item #	Outside Diameter	Wall Thickness	Maximum Working Pressure ¹	Minimum Burst Pressure ¹	Minimum Bend Radius	Price (per foot)
PT200-04NA	1/4"	.062"	65 psi	195 psi	1"	\$0.27

972-195	1/2"	.035"	50'	\$1.79	\$89.50

Utility Tube Cutter

Cut hard and soft copper, aluminum, brass, carbon steel and stainless steel tubing, up to 1-1/8" OD. Features an enclosed feed screw to eliminate clogging and jamming. Grooved rolls for close to flare cuts and a fold away reamer.

Caution: Sharp blade! Keep hands and fingers away from cutting surface.

DT150	Utility Tube Cutter	\$26.20
DT1422R	Replacement Blade	\$10.99

Spring Tube Benders

These tube bending springs operate in hand bending copper, aluminum and other thin-walled tubing. True bends with minimum tube wall collapsing. Belled at one end for easier removal.

Item #	Tube OD	Length	Price
DT104	1/4"	10"	\$3.82
DT105	5/16"	10"	\$5.96
DT106	3/8"	10"	\$4.09
DT107	7/16"	12"	\$12.65
DT108	1/2"	12"	\$5.46
DT1010	5/8"	12"	\$7.16

45° Double Flaring Tool

New style tool makes single or double flaring quick and easy.

- Flares copper, aluminum, brass, Bundyweld, and steel tubing.
- Cam action provides positive non-slip grip on the tubing with just a squeeze of the handle.
- Double flaring bar also serves as gauge for correct tubing height to insure perfect flares.
- Single 45° flares 3/16", 1/4", 5/16", 3/8", 1/2" and 5/8" OD tubing (up to 1/2" for double flares).
- Components available separately.

DT220	Double Flaring Tool	\$144.85
DT210	Tool for single flaring	\$109.63
DT221	Double flaring bar	\$39.70

45° Flaring Tool

Economical, fast-operating tool forms a 45° flare in soft copper, aluminum and brass tubing.

- Quick slip-on aluminum alloy yoke.
- Swiveling hard chrome finished cone assures smooth flares.
- Yoke slips down over top of bar and locks into position with one turn.
- Single flares 3/16", 1/4", 5/16", 3/8", 7/16", 1/2" and 5/8" OD tubing.

DT1022	Flaring Tool (45°)	\$43.97
---------------	---------------------------	----------------

Handheld Plastic Tube and Hose Cutter

This handy tool cuts plastic tubing and hose up to 1" OD. Lightweight and durable for long service life.

Not for use with wire-reinforced hose.

DT135	Plastic Tube Cutter	\$43.95
DT135B	Replacement Blade	\$15.19

Plastic Tube and Hose Cutter

Cuts plastic tubing and hose up to 1/2" OD. Mounts on bench or wall. Designed to close automatically for safety when not in use.

Not for use with wire-reinforced hose.

DT191	Plastic Tube Cutter	\$12.95
DT191B	Replacement Blade	\$5.50

Metal Tube Cutting and Flaring Kit

Cutting and flaring metal tubing just became a little easier with the convenient DT345 Tube Cutting and Flaring Kit.

Features a quality-made double flaring tool offering accurate single flares on 3/16" thru 5/8" tubing

- Hardened, smooth cone for accurate 45° flares.
- Single flares on 3/16" thru 5/8" tubing.
- Double flares on 3/16" thru 1/2" tubing.
- Clamp screw for easy clamping and removal of tubes.
- Flaring bar installed from either side of yoke.
- Flares soft copper, brass, aluminum and mild steel (JIC and Bundy) tubing.

Caution: The DT150 has a sharp blade! Keep hands and fingers away from cutting surface.

Kit components can be ordered separately.

DT345K	Tube Cutting and Flaring Kit	\$134.48
DT345	45° Flaring Tool w/ case and Double Flare Adapters	\$108.28
DT346-3	3/16" Double Flare Adapter	\$10.66
DT346-4	1/4" Double Flare Adapter	\$10.66
DT346-5	5/16" Double Flare Adapter	\$10.66

Port and Connector Thread Sizes

NATIONAL PIPE THREADS

There are several variations of pipe threads. Thread forms include the Dryseal American Standard Taper Pipe Thread (NPTF), the National Pipe Straight Threads for Mechanical Joints (NPSM) and the dryseal American Fuel Internal Straight Pipe Thread (NPSF). Each series is normally identified by the abbreviated letter designation.

The NPTF thread is recommended for hydraulic service. This thread series is used on both male and female ends and forms a seal by the interference fit at the root and crest of the mating threads. The NPTF male also has an internal chamfer of 30° which allows it to seal at the seat with female NPSM pipe swivels. The NPSM is a straight pipe thread and sealing is obtained by the mating of the 30° seats of the male and female ends.

TUBE FITTINGS

D.O.T. Air Brake: These fittings are available in two styles for nylon tubing, and one style for copper tubing. The most popular features a bite-type sleeve or ferrule that is compressed between the male fitting and a tube nut. Use with NT100 nylon tubing. May also be used with copper tubing by replacing the nut, sleeve, and insert with a long nut and spherical insert. Push-In air brake fittings are also available (nylon tubing only).

SAE 45° Flare: The seal is obtained by the mating of two beveled metal surfaces. The function of the threads is simply to draw these two surfaces together. These couplings are usually used for low pressure applications such as refrigerant and fuel lines in conjunction with copper tubing which flares easily to 45°.

Compression: Typically used in instrumentation, hydraulic and pneumatic systems. These fittings seal when both ends of the sleeve are

compressed during assembly and deflect into the tubing diameter to form two parallel grooves. Since sealing results from nondestructive surface contact between sleeve and tubing, longitudinal defects can affect the seal. Application of this fitting is limited to thin-walled soft tubing, usually copper, and low-pressure vibration-free systems.

Push-In: This is a simple, non-threaded connection used commonly in compressed air, pneumatic instrumentation, circuit, lubricant and cooling lines. The seal is formed by an O-ring of Buna-N construction. Use with PT230 and PT240 plastic tubing. No tools required; just push to connect. To disconnect, depress the collet and withdraw the tubing.

Inverted Flare: This connection is frequently used in automotive systems, such as hydraulic brake, power steering, fuel lines and transmission cooler lines. The male connector can be a 45° flare in the tube form or a 42° seat in the machined adapter form. The female has a straight thread with a 42° inverted flare. The seal takes place on the flared surfaces. Inverted flare provides excellent vibration resistance. Use with copper, brass, aluminum and steel hydraulic tubing that can be flared.

Poly-Tube Flareless: These fittings consist of a brass fitting and nut with a plastic sleeve. The sleeve is compressed between the fitting and the nut. Poly-Tube fittings are typically found in pneumatic instrumentation circuits, lubricant and cooling lines. Use with PT200 and PT240 plastic tubing. Not recommended for steel tubing.

Threaded Sleeve: These self-flaring fittings do not require a special flaring operation. During nut tightening, a special wedge-shaped sleeve presses against the tubing end to create a flare. The fitting works best on thin-walled tubing, where high torque is not required to produce a flare. This joint is mechanically strong and vibration resistant, with good reusability.

Nominal Size	Dash Size	D.O.T. Air Brake	National Pipe Thread	SAE 45° Flare	Compression	Inverted Flare	Poly-Tube Flareless	Threaded Sleeve
1/8"	-02		1/8-27	5/16-24	5/16-24	5/16-28	5/16-24	5/16-24
3/16"	-03			3/8-24	3/8-24	3/8-24	3/8-24	3/8-24
1/4"	-04	7/16-24	1/4-18	7/16-20	7/16-27	7/16-24	3/8-24	7/16-24
5/16"	-05			1/2-20	1/2-24	1/2-20	7/16-24	1/2-24
3/8"	-06	17/32-24	3/8-18	5/8-18	9/16-24	5/8-18	1/2-24	9/16-20
7/16"	-07			11/16-16	5/8-24	11/16-18		
1/2"	-08	11/16-20	1/2-14	3/4-16	11/16-20	3/4-18	11/16-20	
5/8"	-10	13/16-18		7/8-14	13/16-18	7/8-18		
3/4"	-12	1-18	3/4-14	1 1/16-14	1-18	1 1/16-16		
7/8"	-14			1 1/4-12		1 3/16-16		
1"	-16	1 1/4-16	1-11 1/2	1 3/8-12	1 1/4-18	1 5/16-16		

Nominal size is *not* the thread size. Nominal size usually refers to the pipe (inside diameter) or tubing (outside diameter) for which the fitting is intended.
